

ScamShield AI

AI-Powered Cyber Scam Prevention & Digital Safety Platform

Theme: Smart Cities / Public Safety / Digital Trust / Geospatial Law Enforcement

Problem Statement: AI for Digital Public Safety: Defeating Counterfeiting, Fraud & Digital Arrest Scams

Team name: Binary Brains

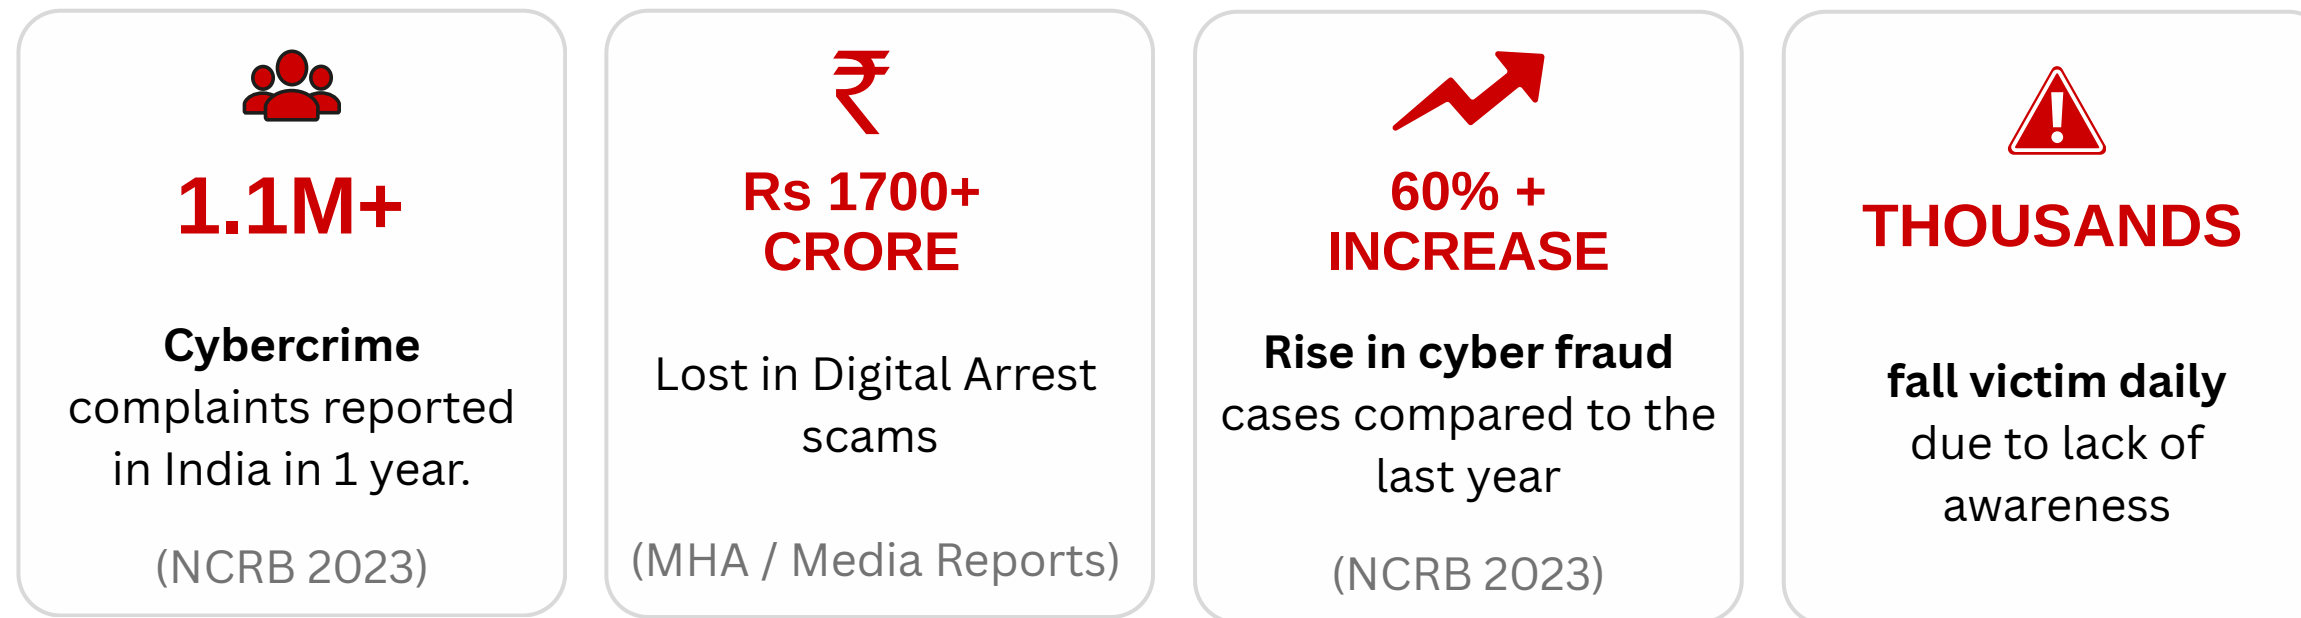

Team Members: Lavanya Gosain
Manjeet Yadav
Krish Sharma

Detect. Educate. Protect.

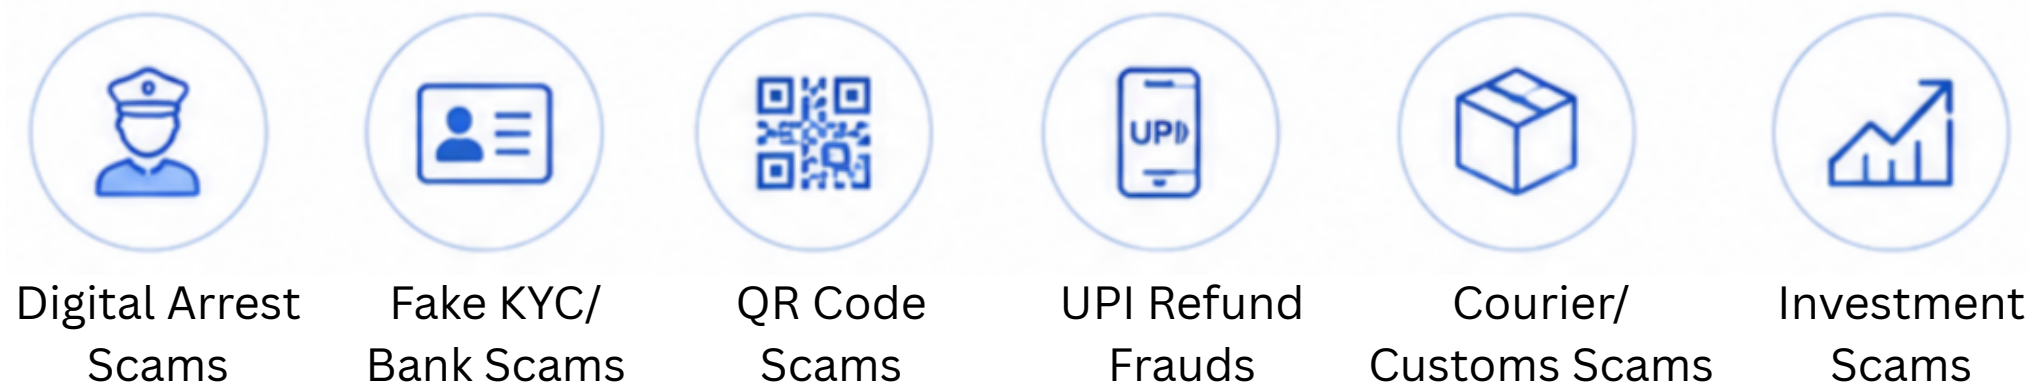

PROBLEM STATEMENT

India is facing an unprecedented surge in cyber scams, leaving millions **financially, emotionally and digitally vulnerable.**

THE ALARMING REALITY

COMMON SCAM CATEGORIES

WHY IS THIS HAPPENING?

- Scammers use **AI-generated voices**, fake identities and deepfake videos.
- They create **urgency, fear and confusion** to manipulate victims.
- Victims **don't recognise red flags** in time.
- Existing tools only **identify spam**, not scam intent.
- Reporting is low and intelligence is **not unified**.

 The goal is not just scam detection, but building **Scam Immunity** for every citizen.

OUR SOLUTION

ScamShield AI

An AI-powered platform that protects citizens through prevention instead of recovery.

Dashboard

Personal scam immunity score, weekly insights, progress tracking and recommended actions

Scam Scanner

Scan texts, screenshots, links, QR codes, UPI requests and calls to detect scams instantly and explain the risk

Simulation Lab

Practice real-world scam scenarios and build safe response habits through simulations

Easy . Medium . Hard

AI Scam Coach

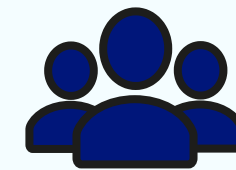

Ask anything, Get instant answers and safety guidance in English and Hindi

Scam Radar

Live scam heatmap, trend analytics and campaign clusters to keep you updated about raising trends

Safety Circle

Add trusted contacts. Get help and alerts in emergencies or suspicious situations.

Learning Missions

Gamified learning modules, daily missions, XP points and badges to improve scam immunity

Report Scam

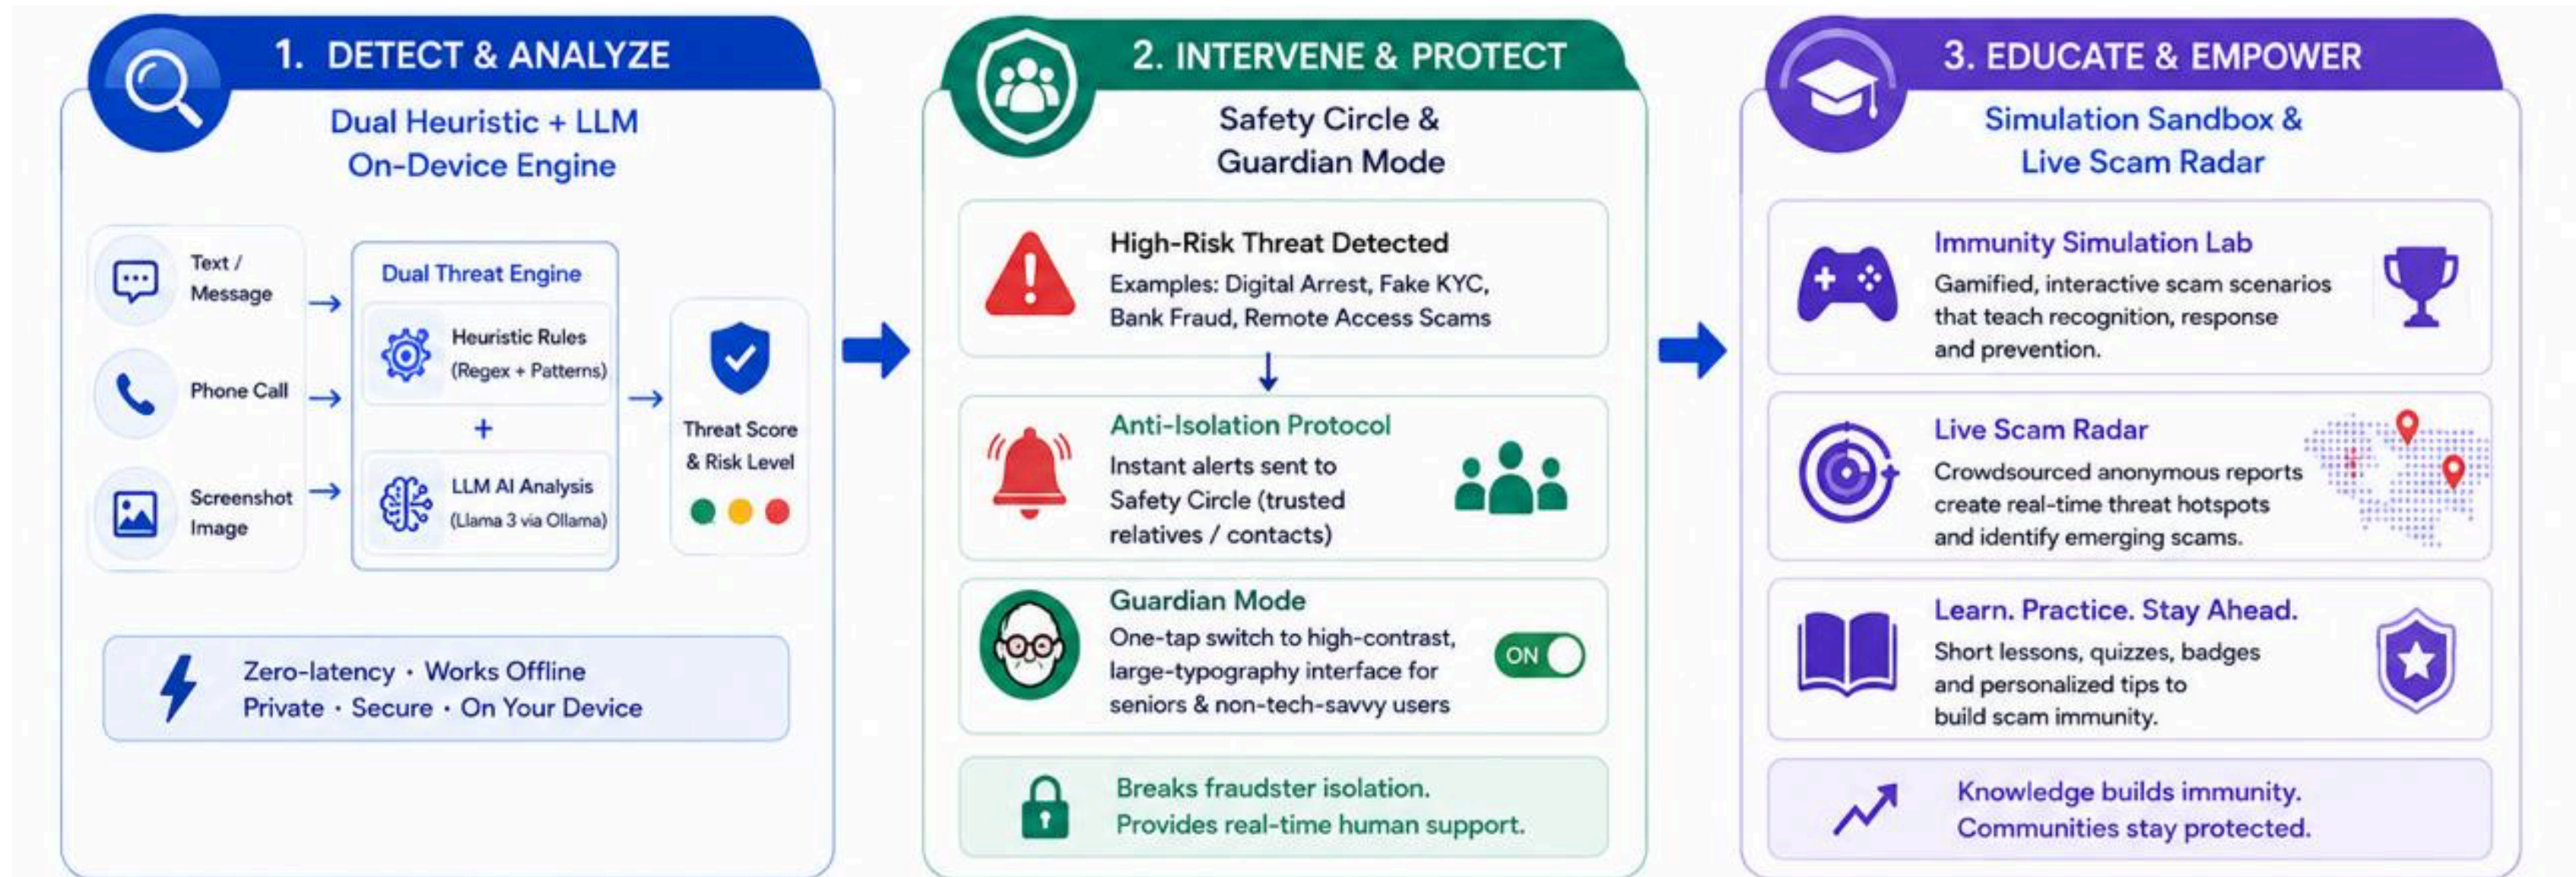

Report scams anonymously and help others

Privacy First

Your data stays private, No passwords, OTPs or bank details are stored or shared.

HOW IT WORKS

KEY PILLARS

Dual Threat Engine

Combines instant deterministic regex rules with local LLM AI (Llama 3 via Ollama) for zero-latency, private analysis of suspicious texts, calls, or screenshots.

Anti-Isolation Protocol

Automatically detects high-risk threats (e.g., Digital Arrest, fake KYC) and triggers Safety Circle alerts to trusted relatives, breaking the fraudster's isolation strategy.

Guardian Accessibility

Instant one-tap switch to high-contrast, large-typography UI designed for senior citizens and non-tech-savvy users.

Immunity Simulation Lab

Gamified interactive scenarios that train users to recognize manipulation tactics in a safe sandbox environment.

Crowdsourced Scam Radar

Aggregates anonymous user reports to visualize regional threat hotspots and identify coordinated scam campaigns using semantic clustering.

100% Private
All analysis on-device

Works Offline
No internet required for core engine

No Data Leaves Device
Your privacy is our priority

Stronger Together
Community + AI = Safer India

INNOVATION & IMPACT

What makes ScamShield AI different?

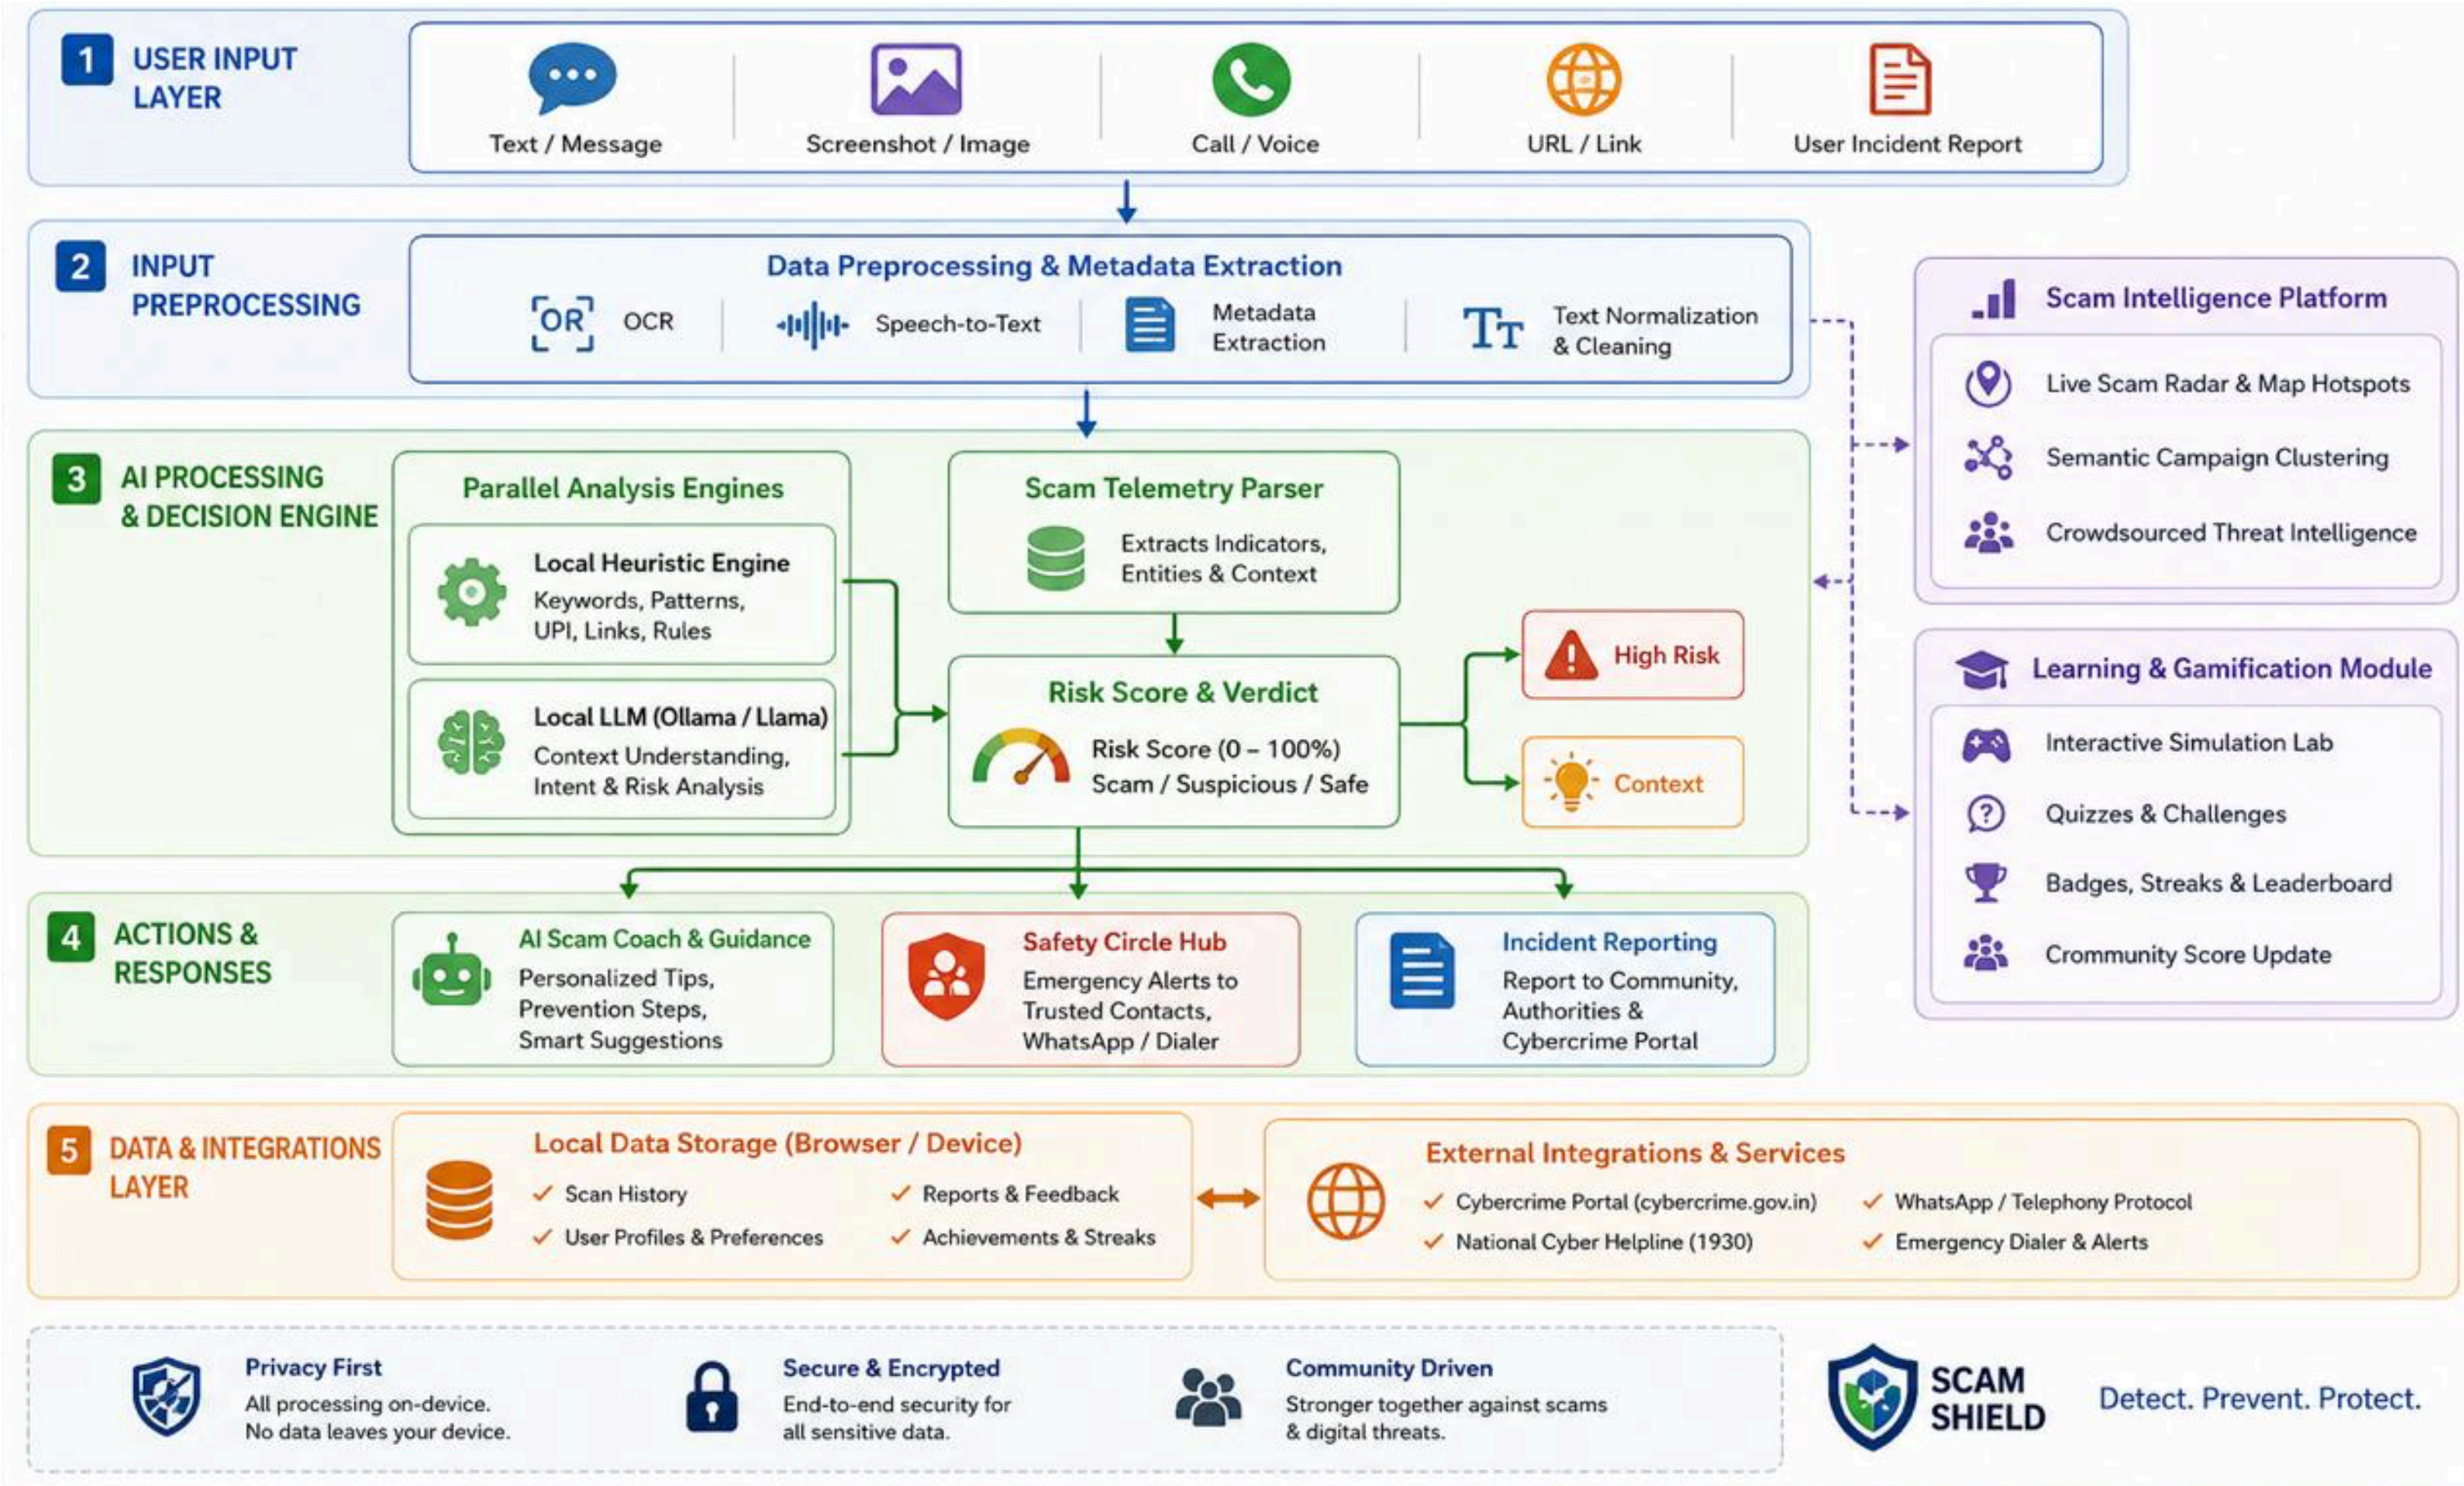

Existing Apps	ScamShield AI
Detect Scams Only	Detect + Educate + Empower
One-time alerts	Continuous learning & improvement
Generic advice	Personalized AI coaching
No preparedness score	Scan immunity score
No simulation or practice	Interactive scam simulations
No community intelligence	Community reports & Scam Radar

Expected Impact

 Reduce Scams Prevent financial losses and protect citizens early.	 Improve Awareness Increase digital literacy through engaging learning.	 Faster Reporting Crowdsourced intelligence for quick fraud detection.
 Stronger Communities Safety circle builds trust and support networks.	 Data-Driven Insights AI-driven analytics to improve trends and high-risk areas.	 Safer Digital India Empowering citizens to become scam-proof and confident online.

ScamShield AI turns awareness into **action**, building a **scam-resilient India**.
